

Multi Desktop Live DVD

For Intel-compatible, 32 and 64-bit computers

Ensure that your DVD drive is capable of reading dual-layer DVD discs and that your computer is configured to boot from the DVD drive. Insert the disc into the DVD drive, and restart your computer.

At the boot menu, select your preferred desktop environment. If you are unsure, simply press ENTER to select the default. The boot loader will automatically detect your CPU, but you may select a 32-bit or 64-bit image manually.

We hope that you enjoy using Fedora. If so, you can install it to your computer using the "Install to Hard Disk" icon on the desktop or Activities menu.

For further assistance, visit <http://help.fedoraproject.org>

MINIMUM REQUIREMENTS: 400 MHz 32-bit Intel-compatible processor with 768 MB RAM. Installation of the complete package set can occupy over 9 GB of hard drive space.

A complete machine-readable copy of the source code corresponding to portions of the accompanying Fedora 20 release is available upon request. This offer is valid to anyone in receipt of this information and shall expire three years following the date of the final distribution of this release by Red Hat, Inc.

To obtain such source code, send a check or money order in the amount of US \$10.00 to:

Fedora Legal c/o Red Hat, Inc. | 1801 Varsity Drive | Raleigh, NC 27606 USA
Please write "source for Fedora 20" in the memo line of your payment.

You may also access a copy of this source code at:
<http://dl.fedoraproject.org/pub/fedora/linux/releases/20/Everything/source/>
